RING BATTLE A GORY ONE

ROBINSON GETS DECISION AFTER NICHOLS' SECOND THROWS UP SPONGE.

The fight between Frank Nichols and "Slim" Robinson of the New York, at the Chinese Theater on Saturday night, was about the goryst proposition ever seen in the ring here. At the start the sailor gave Nichols some severe blows which made him wobble. Nichols stayed wobbly all through the four rounds of the contest, but the sailor soon found that he was a decidedly dangerous wobbly opponent.

Nichols took a terrible beating, and many thought he would be knocked out in the first round. But the second round found him improving considerably and he gave Robinson some blows that checked the sailor's speed. Nichols rushed things much of the time, though constantly getting blows that should have been knockouts. It was evident that Robinson had not a knockout blow in him, at least for as tough a stayer as Nichols. The latter's grogginess at times appeared to be approaching the limit, but he managed to duck and avoid Robinson's heaviest swings. His second threw up the sponge towards the end of the fourth round. Nichols was thought by many to have a chance to win in the end, but his second's action settled the contest.

There were several interesting preliminaries, the first one being a battle with four blind-folded sailors in the ring at once. It kept the house in a roar of laughter. The men felt their way about the ring and swung on whatever they encountered. The lights went out during one of the preliminaries and for fifteen or twenty minutes the house was in darkness. Referee Mike Patton held the house down with songs, stories and imitations. Patton made a very creditable impromptu showing and was fully equal to the emergency.

THE ADVANTAGES CEMENT ROOFING

POSSESSES OVER

Tin, Iron and Steel Roofing IT CANNOT RUST.

Gases, fumes, moisture, coal soot and smoke cannot injure or effect cement roofing. It is better adapted for application over uneven surfaces, such as old shingles or metal roofs, obviating the expense of removing the same. It will not rattle from wind and storm, nor create any noise from rain falling upon it. The materials used in cement roofing are the best non-conductors of heat and cold known, therefore it will keep the building warmer in winter and cooler in summer than a metal roof. Samples and full particulars mailed on request.
